Examiner's Amendment

1. An examiner's amendment to the record appears below. Should changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312.

To ensure consideration of such amendment, it must be submitted no later than the payment of the issue.

2. Authorization for the examiner's amendment was given in a telephone interview with Mr. Alan S. Hodes on 5/20/2005

The application has been amended as follows.

In the claims

3. Claims 1-64 and 66-95 are allowed
4. Please amend the claims as attached.

Drawings

5. The drawings are objected to because figure 1 and 4-15 contain shades. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency.

Art Unit: 2157

Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Reason for allowance

6. The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches or suggests a method of transferring application-generated structured data from a client to a server, such that information structures specified by the application generated structured data can be automatically expanded into corresponding information structures displayable by a website in communication with the server, the method including the steps of: wherein the converting step includes interpreting the application-generated structured data and creating a definition of a meta-design object model of the application-generated structured data and packaging all relevant data including meta-design object model and graphics files or other information items into a source independent data package, creating or modifying on the server, in accordance with the received source-independent data package, an information structures corresponding to the information structures specified by the application-generated structured data, wherein the information structures created or modified on the server include back references to the information structures specified by the application-generated structured data, so that if the original application-generated
